Animal totems of Cancer are the crab and other sea or land creatures with an exoskeleton, such as the crayfish, lobster, and the Egyptian scarab beetle. The octopus is a devoted mother and elephants are known for their strong family bonds. They have great memories and gather to honor the death of a family member or friend of the herd.

Uplifting and balancing, Jasmine is an antidepressant and an aphrodisiac. Called "the Moonlight of the Grove" or "Mistress of the Night" in India, this exotic oil helps you to access your intuition and heightens spiritual awareness. Moonstones vary in color from milky white to iridescent blues. These soothing stones connect us to feminine energy and are associated with sensitivity, intuition, and emotion. Their ephemeral sheen is a reminder that all things submit to the cycle of change. When a Moonstone is damaged, it can lose its sheen and become dark and mysterious, like the New Moon.

**I use my intuition to move forward in life.**

The High Priestess (Moon) encourages us to trust our instincts. The Chariot reminds us that we should not fear change or movement as we are all under the protective canopy of heaven and the stars.
